

**Office Memorandum • UNITED STATES GOVERNMENT****TO :** Director, PIC *ca***DATE:** 8 June 1959**FROM :** Special Assistant to the Director, PIC**SUBJECT:** ATIC Request for Use of Project Processing Facilities for  
Special Film Requirements

25X1

1. Major Charles Randall from ATIC requested that an inquiry be made to ascertain if it would be possible for them to use the project facilities at EK for processing the film which one of their collection systems will be obtaining in the very near future. The project name was [REDACTED] The film would be 18 inches wide and 6,000 feet long, each picture, which is a panoramic scan, being 12 feet or more in length. The input cycle would be sporadic, about once every two or three months; the first would become available in approximately three months.

2. ATIC is making this request on their own separately from AFCIN who does not agree that this procedure should be used so care should be taken not to disclose this subject. ATIC feels that it is imperative that this material be handled under only the most controlled conditions. Major Randall was told that his request would be forwarded through the proper channels to the project director for his consideration.
